The first of these is the
 fact that the population
 of the world is increasing
 at a rapid rate. This is
 due to a number of factors,
 including improved medical
 care, increased food supply,
 and a general increase in
 living standards. The result
 is that the world is becoming
 more crowded, and this has
 led to a number of problems,
 including pollution, over-
 crowding, and a strain on
 natural resources. It is
 therefore essential that we
 find ways to manage this
 growth, and to ensure that
 the benefits of development
 are shared by all.

of Southampton
